PROFESSIONAL SUMMARY

Software Developer with expertise in React.js and TypeScript. Specialized in scalable web applications with modern state management (Redux Toolkit, RTK Query) and enterprise authentication (JWT, Keycloak). Proficient in form-driven applications using React Hook Form and data interfaces with TanStack Table. Leverages AI tools (Cursor, GitHub Copilot, Claude, ChatGPT) to accelerate development. Good Front-end foundation with continuous learning mindset.

WORK HISTORY

React.js Developer, Sep 2023 – Present
Tecbert LLP – Calicut, India

- Built responsive UIs using React.js, TypeScript, Redux Toolkit, and RTK Query ensuring optimal performance.
- Integrated Supabase for real-time data synchronization and backend services.
- Implemented secure authentication with JWT and Keycloak for enterprise identity management with RBAC.
- Designed modern UIs with Tailwind CSS and shadcn/ui maintaining design consistency.
- Utilized AI tools (ChatGPT, Copilot, Claude) for rapid prototyping, optimization, and architecture decisions.
- Leveraged React Hook Form for efficient form management with complex validation across multi-step forms.
- Built data-rich interfaces using TanStack Table for advanced visualization, sorting, filtering, and pagination.

React.js Developer, Dec 2022 – Aug 2023
Infinite Open Source Solutions LLP – Calicut, India

- Migrated legacy Laravel applications to React.js, improving UI/UX, performance, and maintainability.
- Developed custom React hooks for code reusability, reducing development time by 25%.
- Enhanced UX with real-time features including session tracking with live clock timers.
- Collaborated with backend teams to design and consume RESTful APIs.

MERN Stack Intern, May 2022 – Dec 2022
Futura Labs – Calicut, India

- Built full-stack e-commerce features including dynamic filter cart functionality.
- Developed reusable custom hooks improving code quality and productivity.
- Gained hands-on experience with MongoDB, Express.js, React.js, and Node.js stack.

PROFESSIONAL HIGHLIGHTS

Desklog Time Tracking Software with Task Timeline

Tech: React.js, TypeScript, Redux Toolkit, TanStack Table, Tailwind CSS, Chart.js

- Developed comprehensive time tracking application featuring real-time task monitoring and visual timeline representation.
- Implemented interactive data tables using TanStack Table for efficient task management with sorting and filtering.
- Built dynamic charts and analytics dashboards to visualize productivity metrics and time allocation.
- Integrated Redux Toolkit for seamless state management across multiple tracking modules.

Customer Onboarding Platform

Tech: TypeScript, React.js, RTK Query, React Query, React Hook Form, Tailwind CSS, shadcn/ui, Keycloak

- Architected comprehensive customer onboarding application with sophisticated nine-step wizard interface.
- Implemented Keycloak-based authentication with role-based access control for secure user management.
- Designed complex form validations and state management across multiple stages using React Hook Form.
- Integrated server state management using RTK Query for efficient caching and seamless API integration.
